The application is a SPRING BOOT application.

To Run:
Right-click on the project name and choose "Run as SpringBoot Application" in any IDE like Eclipse or Intellij
OR
From the command line, from the top-level directory, run:
> **mvn spring-boot:run**
OR
Package the application as a jar by running
> mvn package
The jar file will be created in the target folder and we can just execute that jar with no command line arguments.

After running the project,
Either follow the input prompts in the command line
OR
Visit **localhost:8080** and fill the form.
